Model 30-M2210
Use in Right Hand

Light-in-Weight

Weighing only 14.4 oz. makes them easier to use, more convenient than traditional forged blade tinner

Patented Offset Blade Design

Flows material making long cuts easy and keeping hands safely above material

Replaceable Blades

Economical and practical

2 3/4" Cut Length

Makes long cuts easy & straight

Model 30-M2110
Use in Left Hand

A BETTER WAY TO CUT!

Compare MagSnips® to traditional tinner snips

- **EASIER!**
- **FASTER!**
- **SAFER!**

- **Material Interferes**
- **Difficult to Use**
- **Exposed Sharp Edges**

Product Comparison

MagSnips®

- Offset blades keep hands safely above material
- Long cuts are easy because offset blades flow material away from the blades
- Light in weight cast magnesium handles for ease of use
- Blades are easily replaceable with screwdriver and wrench
- Model 30-M2210 cuts straight and curves to the left

- Model 30-M2110 cuts straight and curves to the right

Conventional Tinner Snip

- Material does not flow away from blades and hand
- Hard to use for long cuts
- Traditional forged steel tinner snips are heavy and can fatigue hand with extensive use
